

## Release Form

The doctor in our clinic specializes in the diagnosis and treatment of functional vision problems. Our clinic does visual efficiency and visual information processing evaluations. The doctor in our clinic does not perform primary-care eye health or refractive examinations. We do recommend that you have an eye health and refractive exam yearly by a primary-care optometrist. If we require you to have this exam prior to your visit with our doctor we will let you know. If you would like a list of primary care optometrists please let us know.

I understand that the doctor will not be assessing me/my child's eye health or doing a refractive examination in the course of his/her evaluations. I further understand that it is recommended that I have an eye health and refractive examination yearly by a primary-care optometrist. I agree to allow MVTC to send the records from any of my exam(s) to my primary care optometrist, pediatrician, teacher, therapist, or any other care provider.

Signed (patient or parent if patient under 18)
